Company profile

Made in Germany

Since 1875, FLORA has specialised in the development and manufacture of high-quality and durable garden tools and equipment. Even in the early years, the values which FLORA still lives by were established: quality, technology and know-how. Our customers can rely on us – we are ready and waiting. Worldwide. From the heart.

Quality since 1875

A skilled team, our ability to innovate, and the use of the most up-to-date technologies – these are our guarantee for top-quality products. We are responsible for the entire process chain, from development to manufacture and assembly right up to despatch.

Urbano – Electric mobility for external cleaning, landscape management and transportation

“Climate protection”, “work efficiency” and “sorting of materials” being the key words of our time, municipal and private services are being faced with new challenges. The new Urbano from FLORA represents the dawn of a new era, combining environmental protection, performance and comfort in one while also meeting the demands placed on contemporary external cleaning services and green area maintenance.

FLORA Urbano is based on a platform concept for transporting work tools and materials on carrier vehicles which feature alternative drive systems, for example small electrical transporters or cargo bicycles.

The Urbano was designed for three areas of application in particular: external cleaning, landscape management and cemetery maintenance. Each device and material has its own fixed place. Everything is within easy reach. The vehicle’s level of performance is sure to impress. You are sure to find plenty of space on the FLORA Urbano for manual tools, power tools with batteries, work materials, material such as plants or topsoil, as

well as general or green waste. The concept includes both trailers and stand-alone vehicles.

Master

Urbano – Electric mobility for external cleaning, landscape management and transportation

Speedy

Quick, streamlined, urban!

At home in the city. The Urbano Speedy is quick, agile and able to carry a lot of things. With an Easy Arena he has the most important tools for outdoor cleaning on board. The pedelec's electrical support means that longer distances or hilly terrain are no problem – meaning you can reach the working place site with considerable ease.

Pensum

A cargo bike for endless mobility!

The Urbano Pensum can be comfortably used anywhere where tools and working materials are needed – quickly. The pedelec, with powerful electric motor supports the rider, meaning that hills and journeys with heavy loads can be handled easily. A generous amount of storage space provides plenty of room for tools and materials. Brackets and boxes ensure that objects can be reached quickly and safely.

Urbano – Electric mobility for external cleaning, landscape management and transportation

Master

Experience true pulling power!

Got a lot to transport? Then the Urbano Master is in its element. Powerful lugged tyres, a large, easily-accessible loading platform and one or multiple trailers for carrying materials. When it comes to the Urbano Master the possibilities are huge. Whether you're looking to transport power tools, waste or enough tools for an entire workforce, the Urbano Master can fit it all!

Trailer

The ingenious space saver for transporting large volumes!

Green waste, soil, waste, plants or leaves. When it comes to the Urbano Trailer only one rule applies: pack it all in there! The trailer particularly demonstrates its strengths when used in cemeteries or long stretches of green space. By using multiple trailers, even demanding work processes can be perfectly coordinated across multiple stations. Wave good-bye to all your maintenance and disposal problems!

Further detailed information can be found in our Urbano brochure

Trolleys for outdoor cleaning

Accurato – the flexible ones

For everybody who is looking for a flexible, all-round product for daily use in street cleaning operations and in green spaces such as public parks, Accurato is what they need. Numerous functions are included, and up to four different handle tools can be carried.

Carrier – the special ones

The Carrier trolleys are ideal for special situations and requirements. They provide the optimal solution for landscaping work, for transporting large quantities of green waste and for other uses. Tool holders are provided to carry handle tools.

Easy – the light ones

The Easy cleaning trolleys are more than just light and very manoeuvrable. They have a carrying capacity of up to two trash bins, so sorting takes place during collection. This makes Easy the perfect assistants for the cleaning of car parks, industrial and outdoor facilities and public buildings.

Carrier – the special ones

The Carrier Original (right) carries a 120 l rubbish container and has all the advantages of the Accurato series. These include the practical rollers as a loading aid, plus holders for four handle tools and a Greifboy.

The Carrier Volumno increases the volume of a wheelbarrow by almost three times. A handle tool holder is available as an option.

The Carrier Pick Up is a lightweight frame which can carry a 240 l refuse bin ergonomically. It holds two handle tools and a Greifboy.

Litter pickers and accessories

For 30 years, Greifboys have been among the most successful litter pickers internationally – “Made in Germany”, of course. With a large number of different types, Greifboys are ideal for use in all sectors of rubbish collection. Based on a maintenance-free, internal mechanical system, they provide maximum durability, functionality and ergonomics. Landscaping specialists, municipalities and cleaning businesses prefer these Greifboys for garbage disposal work, because they pick up a discarded bus ticket just as easily as a large champagne bottle.

Greifboys Advance series

Greifboy 40

Grabber for picking up refuse and rubbish outdoors, with opened tips for scraping off stuck-on residues.

Rakes

All aluminium rakes have an adjustable head angle.

Strong struts stabilise the wide aluminium rake and the pull-off profile.

The wooden rake in its original shape is especially lightweight.

Made in Germany

Continuously hardened head

Adjustable angle

Screwed connection

Steel rakes

Professional smoothing rake (hardened, adjustable) Robust all-purpose rake with patented adjustability of the head angle for professional use. Insert socket, hardened, galvanised steel, head thickness 4 mm, PU 10

Light hoes, scuffles and scrapers

FLORA's professional scuffles have a hardened blade which is screwed to the sturdy shaft. The blade can be removed and replaced.

The knife scuttle has a flexible spring steel blade, so it is very good for use on slightly uneven surfaces.

The kerb cleaner is a special device for communal cleaning. It helps to clean drains, so it prevents dangerous flooding.

Retail support

POS solutions

POS wall system

Attractive showrooms and good advice from our retailers – these are the basis for creating a successful bond between the trade and the end customers. We support our resellers with modern sales concepts, including sales walls and productspecific displays. We offer a range of standard modules, taking into account individual requirements and requests, or product choices which are dependent on regional differences.

Display stands

Display stands for special product groups

Whether a freestanding single or in a sales wall integrated solution we find the ideal way for the perfect product presentation on any shop floor.

POS Display Landscaping

POS Display Cleaning

Trade fairs

FLORA exhibits at regional and international trade fairs in Germany and abroad. FLORA's aglessly modern trade fair presentations lead our visitors into the users' world, where their attention can be drawn to both new products and tried-and-tested solutions. The conversations and discussions which take place at the trade fairs represent the basis for good relationships and the source for innovations.
